

Semler Scientific, Inc. (www.semlescscientific.com) is an emerging medical risk-assessment company whose diagnostic and testing products and services help to guide patient care and close the gap between cost of care and compensation for care, collaborating with top health care providers and health plans.

Regional Account Manager

The Regional Account Manager is responsible for sales and support of Semler Scientific technologies and services at prospective, new and current customer sites, including clinics, physician offices, medical centers and hospitals.

Key Duties & Responsibilities

- Collaborate with Sales Management on annual and quarterly territory business objectives, including the efficient identification and qualification of potential new customers
- Network with current customers and industry contacts to identify new prospects or expand market intelligence on current prospects
- Communicate Semler Scientific's competitive edge to enhance sales and convert competitive accounts
- Develop new prospects and profiles, managed care provider organizations, and other suitable environments for PAD testing
- Follow up on assigned leads as well as develop new leads
- Develop reference product champions able to speak to prospective and current customers and share positive metrics
- Demonstrate clinical and technical proficiency with Semler Scientific products, including troubleshooting issues that impact product performance and/or customer expectations
- Deliver effective training and support consistent with company established protocols, with timely follow-up to confirm compliance with instructions
- Demonstrate clinical competency related to peripheral vascular disease, relevant testing modalities, (ABI, Duplex, etc.) and the ability to discuss with all levels of clinicians
- Meet with new and existing customers to identify goals and constraints related to patient care and work flow, assess and support site culture with appropriate resources
- Develop relationships with stakeholders at all levels (staff, physicians, vendors) to improve information sharing and identify product champions/decision influencers that will protect ongoing utilization and/or facilitate future sales
- Proactively identify, clarify, evaluate and acknowledge customer needs and concerns regarding products and service by making pre-arranged site visits or Teamviewer sessions, speaking with users, site managers and providers, reviewing utilization and asking probing questions to determine if expectations are being met
- Identify and implement strategies to minimize attrition in at risk accounts
- Manage software upgrade implementations, with consideration given to site specific clinical, operational and data security objectives
