

QuantaFlo® PAD

Certificate Program Overview

Purpose

Semler Scientific®, Inc. offers the accredited **PAD Test with QuantaFlo Certificate Program** ("Certificate Program") to train healthcare providers and support staff to correctly use QuantaFlo PAD* software and test results to assist with the diagnosis and treatment plan for patients with peripheral arterial disease.

The course is complementary to Semler® customers and the following training pathways are offered:

	Provider	Operator (Software version 5.x)	Operator (Software version 4.x)
Definition	Individual reviewing and interpreting the QuantaFlo PAD test results.	Individual administering the QuantaFlo PAD test.	Individual administering the QuantaFlo PAD test.
Scope	The course will teach providers how to review and interpret QuantaFlo PAD test results using computer-based training modules and video, followed by a final assessment which is correlated to the learning objectives.	The course will teach operators how to administer a QuantaFlo test and recognize common troubleshooting issues using video and computer-based simulation modules, in a clinic and home environment, followed by a final assessment which is correlated to the learning objectives.	The course will teach operators how to administer a QuantaFlo test and recognize common troubleshooting issues using video and computer-based simulation modules, in a clinic and home environment, followed by a final assessment which is correlated to the learning objectives.
Learning Objectives	At the end of the course the learner will be able to: 1. Identify how QuantaFlo works 2. Recognize the utility of a QuantaFlo test for detecting early atherosclerotic PAD 3. Evaluate QuantaFlo waveform quality characteristics 4. Interpret a QuantaFlo test report 5. Correlate QuantaFlo PAD index result to Duplex scan elements	At the end of the course the learner will be able to: 1. Demonstrate the steps to complete a successful QuantaFlo test (SW 5.x) 2. Recognize common QuantaFlo troubleshooting issues.	At the end of the course the learner will be able to: 1. Demonstrate the steps to complete a successful QuantaFlo test (SW 4.x) 2. Recognize common QuantaFlo troubleshooting issues.

*QuantaFlo PAD is a testing module of the QuantaFlo product.

QuantaFlo® PAD

Certificate Program Overview

Requisites for a Certificate

	Provider	Operator (Software version 5.x)	Operator (Software version 4.x)
Requisites	1. Complete all course modules (Intro to QuantaFlo, Video Lecture by Dr. Long, Report Practice Module) 2. Score 80% or higher on the final assessment (2 attempts allowed*) 3. Complete a survey (needs assessment)	1. Complete all course modules (5.x: Intro to QuantaFlo, Simulation Clinic Scenario 1 & Home Scenario 2 with Troubleshooting Video, Practice Simulation Scenario) 2. Pass all 8 critical actions on the final assessment simulation (2 attempts allowed*) 3. Complete a survey (needs assessment)	1. Complete all course modules (4.x: Intro to QuantaFlo, Simulation Clinic Scenario 1 & Home Scenario 2 with Troubleshooting Video, Practice Simulation Scenario) 2. Pass all 8 critical actions on the final assessment simulation (2 attempts allowed*) 3. Complete a survey (needs assessment)

**If a learner does not successfully complete the final assessment after two (2) attempts, a request to retake the full course may be submitted to LearnPoint Academy using the contact information below.*

Semler will issue a certificate within fifteen (15) business days after all requisites have been met. The certificate indicates that the learner had the knowledge to successfully complete the program, including an assessment of learning. The certificate is not transferable and is good for the life of the product. A certificate may be invalidated only if the learner it was issued to is found to have not fulfilled the certificate program requirements.

Instructional Personnel

The course was designed by Semler personnel with clinical degrees and over 30 years of training program development experience. Semler support personnel, who manage program activities, were provided training on the Certificate Program's policies, processes and have demonstrated proficiency in their job role.

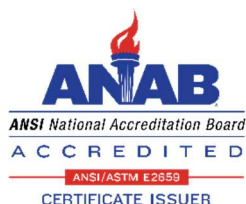

Confidentiality

All participant training records (including name, credentials, email, organization, NPI if applicable, course status, certificate earned) will be held confidential and secure by Semler and are only shared with the customer technical admins and the learner. Any additional records are used only by Semler and authorized accreditation bodies, to administer, manage, and monitor the Certificate Program.

Complaints/Appeals/Accommodations

For any comments, accommodation questions, appeals, or complaints regarding the Certificate Program, please contact Semler Scientific in writing using the email below.

About the Semler Scientific Accredited Certificate Program

The ANSI National Accreditation Board (ANAB) provides accreditation to Certificate Programs developed using internationally recognized ASTM E2659-24 Standards. When accreditation is earned, customers can have confidence that the certificates awarded to learners represent the best in quality education and training.
